Education

Keshav Memorial Institute Of Technology

Nov 20 - Jul 2024

CSE

B Tech

CGPA - 9.2

Experience

Caspex Tech LLP (Client - Experian)

Mar 2024 – Present

Software Engineer

Worked across key enterprise products including Reseller, Capsupload, Capsweb, and Eossp, contributing to full-stack enhancements, defect resolutions, and cloud migration efforts.

Technologies: **Java, Spring Boot, Angular, HTML/CSS, Bootstrap, SQL, JUnit, Maven, Svelte, Insomnia, DbVisualizer**

- Improved reliability and stability by increasing code coverage to 95% and upgrading Spring Boot, reducing errors by 30% and enhancing stability by 40%.
- Boosted data integrity by 50%, cut resource use by 25%, and increased developer productivity by 20% through changelog enforcement, lazy loading, and clearer stack-git URLs.
- Successfully managed complex database migration from MySQL to JPA without data integrity issues.
- Enhanced user satisfaction by 35% by resolving critical search functionality defects.
- Decreased registration-related issues by 40% by stabilizing end-user registration processes.
- Increased defect detection by 30% through comprehensive JUnit tests and functional mocking.
- Eliminated CAPS upload errors completely by implementing robust file upload validations.
- Prevented 90% of file upload errors by enforcing strict page count validations.
- Improved log accuracy by 100%, ensuring accurate tracking of user IP addresses.

Projects

Medibridge

Mar 2025 - Present

Spring Boot | Java | Angular | TypeScript | PostgreSQL | JWT | REST APIs | Postman

- Developed a full-stack healthcare app with secure appointment booking, medical record management, and teleconsultations.
- Implemented JWT authentication and Spring Boot APIs for secure, role-based access.
- Reduced manual scheduling by 85% via Angular UI featuring real-time doctor availability and advanced search.

Text2Vision

Nov 2023 - Feb 2024

Machine Learning | Python | Tensorflow | PyTorch | Streamlit

- Developed a 256×256 text-to-image generation model using StackGAN and BERT tokenizer
- Integrated Conditional Augmentation to improve image diversity and stability
- Achieved 91% accuracy in generating realistic images from user-provided text descriptions

PickNCheck

Jul 2023 - Sep 2023

Machine Learning | TensorFlow | Python | SQLite

- Enhanced frontend with **Streamlit** for dynamic detection and real-time updates. Implemented **YOLOv5** for fast detection (5ms/frame). Prepared dataset with **RoboFlow**, stored items in **SQLite**. Achieved **75% precision** with confidence score ≥ 0.25 .

Skills

Java	Spring boot	MySql	Data Structures	React
Git	Angular	Svelte	JavaScript,HTML,CSS	NodeJS,ExpressJS
Cucumber	AWS	Jenkins	Docker	Python

Certifications

Oracle GenAI Certification

Oracle

Google Analytics Certification

Google
